

# Digital Inclusion

Newsletter  
April – June 2018

## What is the project about?

The partners agree that a social inclusion should start from an intensive adult learning pathway that includes cultural, sensitivity and digital literacy. The integrated and innovative approaches, in order to support employability and social inclusion, will be:

- Exchange of good practices.
- Tested and learned by the staff of the participants' organizations in accordance to the project meetings and mainly during the Joint Staff Training Event; transferred to anyone dealing with an adult learning fostering the development of social, civic, intercultural competences, thanks to Open Educational Resources made available in English and in all partners' National Languages.

## 2nd Transnation Meeting

The 2nd transnational meeting for Digital inclusion was held in the city of Paphos, Cyprus from 4th May to 6th May 2018. Activities that took place: The partners shared a presentation of Good Practice results

- Decided on a selection of the Best Practices
- Each partner presented their leaflets and discussed website implementation.
- The next activities work plan and deadlines were set out

# The Project's Goals

The project answers the priority of promoting digital literacy and exchanging good among young people and migrants through:

- Understanding the concepts, processes and skill associated with identifying ideas, digital education.
- Understands the economic principles and concepts fundamental to digital inclusion.
- Understanding of tools, strategies, and systems used to maintain, monitor, control, and plan the use of financial resources of digital literacy through various ICT tools.
- The project represents an effort of the partners to enhance youth and immigrants employability through the spirit of digital education, giving them the opportunity to identify unmet needs of their communities and then develop enterprises to meet those need by carrying out initiatives in their communities.

## Good Practices

- Talk the User's Language
- Keep the user informed
- Work together in order to maximize expertise, experience and resources to overall meet the users needs more efficiently
- Tailor support around the unique barriers that stop people going online, and adapt to their needs

The project will have impacts at the local, national and European level, in terms of enhancing the expertise of staff involved, as well as in term of increase the know-how of a large adult educators network, because the products and the expected results may be used by all those who work for the adult education and digital literacy of the unemployed and migrants.
